

InAmigos Foundation – Website Improvement Analysis

PRESENTATION OVERVIEW

Prepared by S. Yashwanth Raaj

Web Developer Intern · inamigosfoundation.org.in

Objective

To analyze the InAmigos Foundation website and identify opportunities to improve usability, content presentation, and visitor engagement.

InAmigos Foundation Website Improvement Analysis

Objective

Identify opportunities to improve the website's design, content presentation, accessibility, and user experience to better engage visitors, donors, and volunteers.

Prepared By

S. Yashwanth Raaj

Role

Web Developer Intern

Website

inamigosfoundation.org.in

Date

June 2026

Homepage — Observation & Key Suggestions

Issues Identified

- Call-to-action buttons are not visually dominant.
- Impact information is not immediately visible.
- Homepage contains multiple sections competing for attention.

Recommendations

- Increase visibility of the Donate and Volunteer buttons.
- Display key impact statistics higher on the page.
- Highlight the foundation's achievements near the banner section.

Expected Outcome: Improved visitor engagement and increased action from potential donors and volunteers.

About Us Section — Observation & Recommendations

Observation: The About Us page provides detailed information about the organization and its initiatives. However, the presentation lacks visual hierarchy, making it hard for visitors to scan key details quickly.

Issues Identified

- Content appears lengthy and text-heavy.
- Key information requires scrolling and reading large paragraphs.
- Important initiatives are not highlighted visually.

Recommendations

- Divide content into smaller, scan-friendly sections.
- Use bullet points for major initiatives to improve skimmability.
- Add icons or visual indicators for different programs.
- Highlight mission, vision, and achievements separately.

Expected Outcome: Better readability and easier understanding of the foundation's work.

Statistics Section — Observation & Enhancements

Observation: The website presents impact-related information, which helps build trust and credibility.

Issues Identified

- Statistics could attract more attention.
- Visual emphasis on achievements is limited.
- Impact information can be presented more clearly.

Recommendations

- Use larger statistic cards.
- Add icons alongside impact numbers.
- Include brief descriptions explaining each achievement.
- Use infographic-style presentation.

Expected Outcome: Stronger credibility and improved visitor confidence.

Volunteers Section — Observation & Recommendations

Role Descriptions

Add short descriptions of volunteer roles – time commitment, responsibilities, and impact – so prospects know how to help.

Volunteer Testimonials

Feature short quotes or 1-2 sentence experiences that showcase motivations and outcomes for volunteers.

Highlight Achievements

Showcase volunteer milestones and notable contributions to celebrate and motivate participation.

Gallery — Observation & Action Items

Images are meaningful but lack context. Add short captions for every photo, group images by project or event, and provide simple filters so visitors can browse by category (e.g., Health, Education, Events).

Education Initiative

Add short captions describing the student engagement and specific project goals.

Community Health

Organize images by event to showcase health camp reach and medical support.

Relief Efforts

Group distribution photos and include a filter for "Relief Events" for easy browsing.

Stakeholder Meetings

Ensure professional context is clear with captions identifying project milestones.

Events — Observation & Improvements

1. Separate Upcoming & Past

Create distinct sections for upcoming events (with registration links) and past events (with photos and recaps) so visitors immediately find what they need.

2. Prominent Event Details

Surface date, time, location, brief description, and clear registration/volunteer buttons on each event card.

Contact Section – Observation & Quick Wins

Observation

The contact section provides basic information but can be improved for easier access, quicker communication, and better user experience.

01

Map & Location

Embed a map to show the organization's location for donors and visitors — include address and directions.

Why it helps

Helps visitors easily find the exact location and plan their visit or directions.

Quick Win

Embed Google Map with address, landmark and directions.

02

Quick Contact

Add a WhatsApp or click-to-call option for fast, convenient interactions and faster response times.

Why it helps

Enables instant communication and improves response time for queries.

Quick Win

Add WhatsApp button and click-to-call option for mobile users.

Contact Section — Observation & Quick Wins

Map & Location

Embed a map to show the organization's location for donors and visitors – include address and directions.

Quick Contact

Add a WhatsApp or click-to-call option for fast, convenient interactions and faster response times.

FAQ Snippets

Include brief answers to common questions (donations, volunteering, events) to reduce friction and support load.

Footer — Observation & Refinements

Improve Spacing

Increase padding and group links logically to reduce the crowded appearance and improve legibility.

Prioritize Links

Elevate important links—Donate, Volunteer, Contact—and make them visually distinct to drive actions.

Social Visibility

Ensure social icons are clearly visible, evenly spaced, and link to active social profiles for credibility.

Footer – Observation & Refinements

Observation: The footer contains important information and navigation links; however, the current layout appears crowded, making it harder for visitors to quickly find key actions and social channels.

01

Improve Spacing

Issue: Footer elements appear closely packed, reducing readability.

Suggestion: Increase padding and spacing between sections. Group related links under clear headings.

Benefit: Improves readability and creates a cleaner visual structure.

BEFORE

AFTER

02

Prioritize Links

Issue: Important actions such as Donate, Volunteer, and Contact do not stand out sufficiently.

Suggestion: Highlight these links using buttons, contrasting colors, or larger typography.

Benefit: Encourages user engagement and increases conversions.

BEFORE

AFTER

03

Social Visibility

Issue: Social media icons can be overlooked and may not effectively drive engagement.

Suggestion: Use clearly visible icons with consistent spacing and ensure they link to active profiles.

Benefit: Builds credibility and increases community engagement.

BEFORE

AFTER

RECOMMENDATION

- ✓ Increase footer spacing and organization.
- ✓ Highlight key action links.
- ✓ Improve social media visibility.
- ✓ Use consistent visual hierarchy.

EXPECTED OUTCOME

A cleaner, more organized footer will improve navigation, strengthen user trust, and help visitors quickly access important resources and communication channels.

Overall Website Feedback & Next Steps

Positives: Clear mission and vision, solid information on projects, intuitive navigation, and social initiatives.

Areas to improve: Visual presentation, content organization, engagement features, and impact stories.

Design

Use bolder CTAs, consistent visual hierarchy, and theme colors (#151617, #F2DED0, #BAB6AA) for cohesion.

Content

Condense long sections, add bullets/captions, and surface impact stories to connect emotionally.

Engagement

Add registration flows, WhatsApp contact, testimonials, and clearer CTAs to increase conversions.

Implementation

Prioritize homepage CTA, restructure About/Stats, then iterate on gallery, events, and footer.
